I've meticulously designed buildings standing in seven countries around the world. I've built half a dozen stages and public art pieces by hand. It's time for a new challenge: to reach a broader audience by integrating my extensive design skills alongside my recently acquired programming capabilities.

With my background in design, project management, and leadership of interdisciplinary teams, I am able to bring a high level of insight and efficiency to all aspects of a project.

"Design isn't something I can turn off; it's who I am."
